

FORMULA *Corse*

A new challenge accepted by the **EVO Corse** team: following up the great success of the SanremoCorse line, the best and the most popular racing wheel on the market, thanks to the experience acquired during these years with the competitions and using the best technologies for design and production, Evo Corse is entering in the monoplace circuit racing.

The last creature is the **FORMULA Corse**: an aluminum wheel, available in 13" sizes from 8,5 and 9 for the front wheel and 10-10,5 for the rear wheel, with lightness and strength absolutely not conventional.

Experience and technology made this wheel at the same level as best magnesium wheels on the market, but with a price much more aggressive.

Better handling, better acceleration and cooling during the braking, great stiffness and strength, thanks to its design and especially to its incredible weight, starting from 3,9 Kg;

Available now in **Dallara F3** application, but deliverable on demand in many different applications, all absolutely **monolock**.
