

DakarZero

Born to dominate on the most extreme conditions on Off Road competitions, DakarCorse is now available with an even wider selection of offsets, from -10 to +49.50.

Together with DakarCorse 7X16", the classic As7 aluminium alloy rim, manufactured through a low-pressure procedure for total absence of imperfections or weak-spots, EvoCorse now presents DakarZero 7X16".

Both of this extra strong models designed for 4x4 competition vehicles are fitted with steel inserts, and characterized by an amazing strength/weight ratio. The spokes have been specifically designed to guarantee maximum brakes ventilations

Main benefits from DakarCorse and DakarZero:

Wide fitting options with Ets going from -10 to +49.50.

Comply with T1 e T2 2007 FIA regulations.

Air valve protected from gravels, stones and mud.

Specific racing rim profile in order to fit even biggest brake callipers.

Borders and rim optimized for Off-Road special tire fitting.
